Quick-fit Slip Joint

“Serving the Paper & Converting Industry over 40 Years”

The Quick-fit Slip Joint is used at the end of each straight run where a length less than 59 inch straight piece is required. It consists of a slightly oversized spool piece (11 inches long) that slips over the standard pipe after the rolled end is removed. The O-ring ensures an airtight seal.

Measure required length

Mark approximately 4" less than required length

Mark pipe for cutting

Cut pipe and remove any burrs

Put O-ring on cut pipe and slide slip joint over cut end

Adjust its length, snap clamp over O-ring and one end of the slip joint

Insert slip joint assembly to complete connection
